DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to a position measuring device with a position indicating means, a position measuring means, classified in class 600, subclass 417.
 - II. Claims 8-13, drawn to a position measuring device having a position indicating means with two pieces of laser beam, a position measuring means and a means for calculating a setting position and a direction of laser beam, classified in class 600, subclass 424.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombination disclosed as usable together in a single combination. The subcombination are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a position measuring device not requiring the limitations of invention II, and vice versa. (MPEP § 806.05(d).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
